TRUMP IS STILL POTUS HOW IS THIS STILL SECRET

BREAKING! Intel Insider: It's NOT Over! Trump STILL POTUS & The Re-Birth of Our Republic!

Jim Pugh 35 years theological study ancient scriptures, life & business coach, and wealth of banking experience. Now a financial operations consultant, since 1980. Worldwide travel. Lived in 13 countries. Author.

We have to go back to the original Constitution of 1776. God was in the center of it, based on God's principles and God's laws. There was no segregation of Religion from Government. Religion has to be in Government.

A Federal District, DC, was created in 1790 as the new capital, from lands donated by Maryland and VA and the city was named Washington after Geo Washington, in 1791. The Government was moved from Philadelphia to DC and in 1801 Congress passed an organic act, which federalized the territory, putting the land in an ownership pool, titling it a Federal District.

Initially it was still operating under the framework of the laws of Maryland. In 1871 because of war costs we were bankrupt and Congress devised a scheme with the Bankers that loaned us the money that required certain things.

The Vatican ruled the world, the City of London was the money source of the world and DC joined in 1871 becoming the third leg, the Police state or enforcement arm, the Vatican military arm of the 3 legged stool.

Our freedom ended in 1871 and a second Constitution was created, based on one of the criteria the Bankers instituted, that we had to accomplish to have our debt call forgiven. It was never forgiven because the Vatican had opened up a corporation in Puerto Rico and that Corporation became what is now known as WA DC.

They took the Federal District formed in 1801 and put that within this Corporation and giving this District its own governance.

The District of Columbia became a City State with its own laws, and could do whatever it wanted without approval of the citizenry contained under the original Constitution of 1776.

So, the Corp. came into effect, the City of London forgave the debt call and put us into bankruptcy and so, we've been enslaved from that point until today. And Congress put that District inside the Corporation, making that District then, a foreign country ownership. Then the governing laws established under that Constitution, they put in place as part of the bylaws of the Corporation, that became the laws by which they were going to rule that 10 mile square. That's all of the rulership they had at the time.

But going forward to Roosevelt times, when they enacted the social security act and they forced SS on all of the citizenry under the original Constitution of 1776, we became an asset of that Corporation and they enslaved us by leveraging our ability to generate revenue to repay the debt to the Bankers, who were part of the Corporation. The outcome was that the United States Government was controlled by a Board of Directors. The Board was made up of the Bankers and members of the Hierarchal order of the Catholic Church-the Vatican. They basically put into motion a number of events over time, in history.

Basically, WA DC is a foreign country, it's owned by a foreign country. Everyone who works in WA DC are paid by a foreign country. All of our tax dollars go directly to the Vatican Banking system Cartel. They don't go to the US Treasury. The US Treasury has to borrow money that keeps cycle of debt and the people in WA DC are actually employees of a foreign country governing the sovereign soil of the United States of America.

In March of 2020 Pres Trump enacted a National Emergency and put FEMA in charge of that emergency. FEMA has basically 10 regions set up and they set up an organizational structure allowing them to manage those regions as a governmental entity over those regions. The Governors and all of the Territory under that regency basically is responsive to FEMA. FEMA has the ability with their laws to basically become a true government. They have the ability to eliminate due process, the ability to arrest people without due process, they have the right to set up a court system, they have the right to fund things that need to be funded, the right to do all the things a government can do, but they do not have to have the approval of any governmental authority. Congress doesn't have to approve it, Senate doesn't have to approve it, the Pres doesn't have to approve it, even though he's in the loop. So, by de facto, They have the main governance criteria over those 10 regions until the National Emergency is lifted, and it has not been lifted.

So, in March of 2020, because of the enacted National Emergency, the governmental authority over the Corporation side of things was transferred over to FEMA and they assumed the duties of the Government at that time.

On July 4th Pres Trump said, in essence, at Mt Rushmore, that we the people had gotten back our Government and Melania tweeted the same thing. That signaled that we just moved to the Republic. From that point forward, we have no waiting period to reinitiate things and on that day Trump and the Military became the governing body over the Republic.

At that point in time we had 2 governments. The 80 million people standing with Pres Trump have authority against a government that has authority only by perception and illusion of control. If the people of the country don't stand with Pres Trump they are basically slaves to a Corporate entity and will be treated that way.

What Trump and the Military did on July 4th, was to give the US citizenry were given the right of sovereignty we had with our founding fathers and by God, under the original Constitution. There were transition documents signed that would allow this transfer to take place and it was going to take place under the auspices of the great reset if Trump hadn't been there, but all of the activities to bring the organic Constitution of 1776 up to a current day working model, all of that activity had taken place from July 4th until sometime right before the election. All of it was done and put in place, all the transition laws to bring the Constitution current, all the governance laws, laws of diplomacy, all the financial stuff.

All that was needed that has happened since 1871, that the treason Corporation, needed to come over to the Republic to allow us to hit the ground running when the change happened. And that happened from July 4th to right before the election.

At this time the Corp. Gov. system is controlled by a lot attorneys and judges, so what needs to happen to execute this and bring us back into sovereignty, reclaiming power based on a legal and due process?

The WH, the Congress, and the SC, Federal court system is under and paid by the Corporate system and are Federal employees of the Corp. run by a board of Directors of a foreign power. The Federal Court system is put in place and governed by and paid from the Corp. The SC has districts that they operate over in the court system. All Federal judges report up through the SC Justices and all of them are employees of this foreign entity.

So the Justice system is focused on the conditions set by the Corp. entity, as it relates to the outcome of the laws that they are going to rule on, not the Common

Law that we thought under the original Constitution. It was put in place that all the US citizenry would be governed through the court using maritime law.

That allows the judge to do pretty much whatever the heck they want to do. There are basically no consistent rules from one judge to another. They are basically paid employees of the Corporation, doing what the Corp. wants because they have jurisdiction to make the decisions.

We have to have a cleaning of the WH, Congress, Senate, and SC and the Fed judges all over the US. The only way to have law and order while that activity is taking place is to have FEMA step in under their rules of government go in and affect the law, based on Common law, defined by the original Constitution of 1776.

Along with that the military side deals with Military issues. And the military by definition deals with crimes of treason, sedition, and crimes against humanity. So, as those court cases come out of all of this, they will fall into the Military Justice System and this needs to be tried under the Rule of Law and not what the rule of the Corporation was.

That should come up through the FEMA court system along with Military Court that allows us to now have a complete blanket over the United States focus on what Trump has been preaching all of the time, Rule of Law.

We have 2 currencies, the US Dollar for local transactions and Petro Dollars used by the Bankers to control on an international level. The Petro Dollar is what countries used to settle trade between countries. This allowed the Bankers to have control, through sanctions or squeezing of other countries to control. Before Trump all sanctions were exercised by the CB, with approval of the Vatican.

When Trump first took office he travelled strategically to Saudi Arabia, Israel, the Vatican, and then later the UK to leverage them and have them sign documents to work with us or they would have all of their crimes, illegal laundry, exposed to the world. He was successful in all of these visits.

The success of this endeavor was evidenced in the UK, because he was the first man who ever walked in front of the Queen.

Of the 209 countries every country has their own currency except Europe, which has Euro Dollars and even some of those have their own, but that is only used in country. But on the international stage all the dealing is done through Petro Dollar and so Trump, in order to get control over the CB system, he had to

effectuate control over the Petro Dollars. In Nov of 2019, there was a dry up of Petro Dollars, the printing stopped. So, Trump squeezed the banking system and got control of the Petro Dollar by stopping payments in trade from using it. Every country out there if you look at solvency of their financial system now is bankrupt. This was evidenced when Trump, at some point, took control and folded the CB into the US Treasury. This is another evidence of the 2 Government system. Bringing the Fed into the US Treasury is setting it up for the Republic and there was a lot of activity that had to go on.

With the new system all 209 countries have to get set up with their currency based on assets on a 1 to 1 basis. Because the Petro dollar is no longer the standard, each country has to set up an exchange rate. This is so 1 dollar is valued at 1 dollar no matter what in your own country. The difference will come in the asset value in the country compared to the country they are dealing with when the exchange is taking place. That system has been tested for some time now on an international basis. The value of the currency will be based on the asset value of the country.

That's why Trump gave Corporations tax breaks if they brought their off shore accounts into the country. That's the only place that you get a 1 to 1 value to your dollar. That would also keep money from flowing into the system that was created fraudulently, through laundering, or trafficking, or through drugs, etc. or just printed outside the system.

Any currency outside the US will be devalued to almost 0 and outside money will not be allowed into the system. It will be destroyed. With all that Trump has done, he has cleaned the banking system up and prevented the extortion of the tax payer because all will be based on assets and we won't be responsible to the Banker, the Vatican, or the City of London to provide them with dollars. Any tax dollars that come in after the new system will only go in to taking care of the needs of the country and not to the Vatican Bank.
